Parallel Computing 16 (1990) 387–388
North-Holland

Author index to volume 16 (1990)

Adamopoulos, M., *see* **Evans, D.J.** (2–3) 279–285

Baker, M.A., K.C. Bowler and **R.D. Kenway**, MIMD implementations of linear solvers for oil reservoir simulation (2–3) 313–334
Bowler, K.C., *see* **Baker, M.A.** (2–3) 313–334
Burrage, K., An adaptive numerical integration code for a chain of transputers (2–3) 305–312

Catthoor, F.V.M., *see* **Van Swaaij, M.F.X.B.** (1) 113–121
Conroy, J.M., Parallel nested dissection (2–3) 139–156
Counilh, M.C. and **J. Roman**, Expression for massively parallel algorithms – description and illustrative example (2–3) 239–251

Dehne, F. and **M. Gastaldo**, A note on the load balancing problem for coarse grained hypercube dictionary machines (1) 75– 79
De Man, H.J., *see* **Van Swaaij, M.F.X.B.** (1) 113–121
Dodd, N., Slow annealing versus multiple fast annealing runs – an empirical investigation (2–3) 269–272
Douglas, C.C. and **W.L. Miranker**, Beyond massive parallelism: numerical computation using associative tables (1) 1– 25
Dowling, M.L., Optimal code parallelization using unimodular transformations (2–3) 157–171

Evans, D.J. and **C. Li**, Successive underrelaxation (SUR) and generalised conjugate gradient (GCG) methods for hyperbolic difference equations on a parallel computer (2–3) 207–220
Evans, D.J. and **W.S. Yousif**, The implementation of the explicit block iterative methods on the Balance 8000 parallel computer (1) 81– 97
Evans, D.J., M. Adamopoulos, S. Kortesis and **K. Tsouros**, Searching sets of properties with neural networks (2–3) 279–285
Evans, D.J., *see* **Megson, G.M.** (2–3) 191–205
Evans, D.J., *see* **Megson, G.M.** (2–3) 253–267

Gao, F. and **B.N. Parlett**, A note on communication analysis of parallel sparse Cholesky factorization on a hypercube (1) 59– 60
Garbey, M. and **D. Levine**, Massively parallel computation of conservation laws (2–3) 293–304
Gastaldo, M., *see* **Dehne, F.** (1) 75– 79
Gu, Q.P. and **T. Takaoka**, A sharper analysis of a parallel algorithm for the all pairs shortest path problem (1) 61– 67

Harper, P., *see* **Samad, T.** (2–3) 287–292
Huang, J.-H. and **L. Kleinrock**, Distributed selectsort sorting algorithms on broadcast communication networks (2–3) 183–190

Kamath, C. and **S. Weeratunga**, Implementation of two projection methods on a shared memory multiprocessor: DEC VAX 6240 (2–3) 375–382
Kenway, R.D., *see* **Baker, M.A.** (2–3) 313–334
Kleinrock, L., *see* **Huang, J.-H.** (2–3) 183–190
Kortesis, S., *see* **Evans, D.J.** (2–3) 279–285

Lageweg, B.J., *see* **Veltman, B.** (2–3) 173–182
Lee, R.C.T., *see* **Shyu, S.J.** (2–3) 343–350
